

BRIO GROUP
logistics

**LOGISTICS THROUGH INNOVATION,
DEDICATION, AND TECHNOLOGY.**

ABOUT US

Brio Group was founded in 2006 on the initiative of a few companies specialising in providing Global Service activities. Thanks to these activities they're able to create advanced Integrated Logistics Services projects. Thus logistics outsourcing becomes the core business, managing portions of the supply chain with significant advantages in terms of efficiency, flexibility and the contribution of know-how, technologies and skilled human resources.

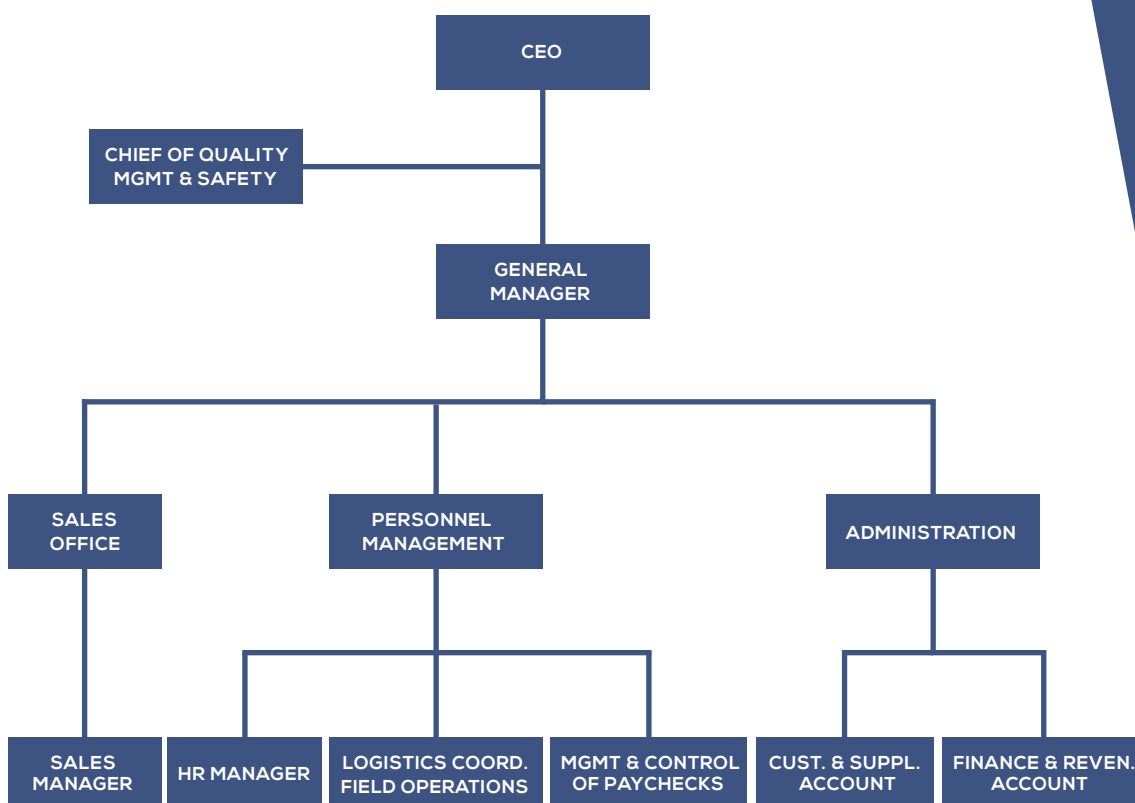

It provides the ability of adapting to market fluctuations without letting them automatically affect the quality of service and pricing, providing efficiency in development. It operates in the Food and Non-Food macro-sectors offering its customers personalised services covering the planning, organisation, management and control of the activities required

It intends to represent the logistic partners on a nationwide level in order to satisfy the current market of its Customers, establishing "total customer satisfaction" as its mission.

Brio Group implements a quality management system as per the requirements of ISO 9001:2008 for the following certification objectives: logistics, transportation, concierge and cleaning, and is registered in the national Auto Carrier registry with number BA/7463680/R.

Brio Group has a fleet of vehicles for their transportation activity, comprised of 10 tractor units and 10 trailers, controlled by highly qualified personnel of our Traffic Office.

Organisational Chart

OUR SERVICES

TRANSPORTATION

We move, transport and deliver in precise times any goods, in any place in Italy, regardless of weight, size, dimensions and number of packages. Thanks to an extensive network, we offer personalised service, characterised by a high quality performance: pick-up at the customer's site, storage in our warehouses, daily transportation to and from all regions in Italy, computerised management of receipts, constant monitoring of shipments.

We always provide means and equipment to deliver the goods with: precision, speed and safety

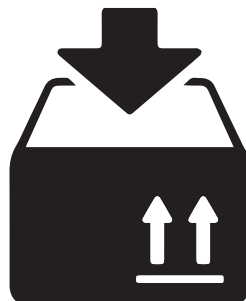

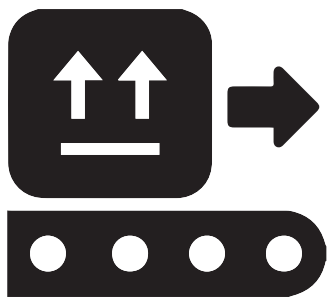

LOGISTICS

Thanks to an extended logistics network Brio Group is able to carry out Advanced Management Projects. Planning, implementing and controlling the flow of goods from the place of origin to the place of consumption is the mission that Brio Group has set for itself. Goods handling services are provided by highly qualified personnel using vehicles equipped with the most innovative technologies.

The know-how acquired over the years allows us to offer our customers operating in the Fashion, Automotive, Food and Non-Food industries, the best conditions in both organisational and economic terms.

SERVICE MGMT

Logistics is the set of transactions designed to optimise the physical flow of materials and information connected to them, which generates as a result of business activities.

Brio Group is able to better manage the various phases of activity setting the objective of exceeding the expectations of the Customer.

Brio Group offers a wide range of tailor-made services, made from the specific needs of the Customer, whereby tangible advantages are obtained along the entire supply chain.

Logistics activities carried out upstream of the production process (inbound or also upstream logistics) merge with the management of the procurement of materials.

Logistics activities located downstream of the production process (also referred to as outbound activities or downstream logistics) involving the management of storage flows and distribution of the finished products.

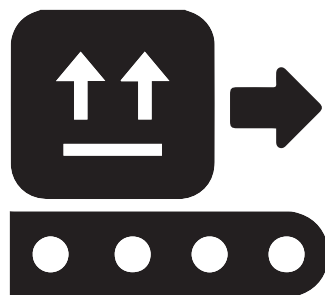

Brio Group establishes itself as a specialised player in the INBOUND and OUTBOUND logistics services
